

RENAU®

COFFEE BREW CONTROLLERS

Designed & Manufactured in the U.S.A. 

Brew with Renau Coffee Controllers

Renau Coffee Controllers were designed for foodservice commercial brewers requiring both time, temperature and liquid level control for optimal recipe results from single to multiple brewing & warming equipment.

Renau Coffee Controllers are a perfect sensing solution for commercial kitchen brewers that maximize quality and flavor, while reducing service and maintenance.

The Renau Coffee Brewer Controllers are fully encapsulated for ultimate protection from the harsh commercial kitchen environment. Patented Technology: Renau's controllers feature patented Single Wire Communication Network, technology which is not found anywhere else in the foodservice equipment industry.

As a microprocessor based control featuring patented technology, Renau controllers significantly increases equipment reliability and life expectancy while reducing service calls, and maintenance. Renau Brewer Controllers are fully encapsulated for ultimate protection from the harsh commercial kitchen environment.

Single Wire Communication provides equipment manufacturers with numerous benefits. This greatly reduces the complexity and cost of wiring harnesses, At the same time enabling compatibility across all Renau display, temperature, switching, and hybrid modules. This modularity allows manufacturers to quickly and easily adapt the same control system design to other equipment models with different power requirements or additional zones. Simply swap power and temperature modules as needed. Not only does this eliminate the need for different internal wiring, but also simplifies and saves time with end product approval and reduces inventory costs.

Why Choose a Renau Coffee Controller?

Renau has had the privilege of addressing technological challenges within the foodservice industry for more than four decades. Our extensive experience and expertise have positioned us as industry leaders, ensuring that your equipment operates optimally and delivers peak performance.

Customer Experience

One of the primary advantages of choosing Renau controllers is the assurance of consistency. In the fast-paced settings of the foodservice industry, sustaining a consistent customer experience can be demanding. Renau's technology ensures that your brewer consistently maintains optimal brew recipes, delivering a reliable customer experience every time.

Cost Savings

Renau's entirely patented production techniques offer more than just cost efficiency across various brewer models. They also reduce expenses on components and guarantee that your coffee brewer remains reliable precisely when you need it. Renau's industry-leading 3-year warranty surpasses all competitors. Our quality controllers substantially diminish the risk of expensive repairs or replacements.

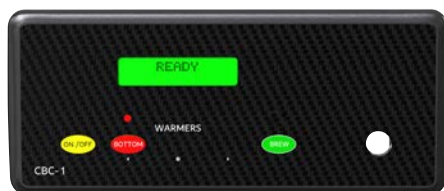

Intuitive controls

Advanced software enhances user-friendliness and ease of use, requiring minimal training and reducing the need for dedicated labor.

Benefits

- Customized solutions available for your product line.
- Smart brewing with the industry's best warranty
- Designed for commercial environments with heavy steam/water.
- Renau's patented controller alerts the operator before failures such as heating elements burning out.
- Single wire communication
- Stable operating parameters - fully encapsulated board

Decanter Brewers

CBC-01
Single Warmer Brewer

CBC-02
Double Warmer Brewer

CBC-03
Triple Warmer Brewer

The **Coffee Brewer Controller** (CBC-01/02/03) was designed for foodservice decanter brewers using 1, 2 or 3 warmers, requiring both time and liquid level control. With controls for 1, 2 or 3 individual warmers, the Renau Coffee Brewer Controllers are a perfect sensing solution for commercial kitchen brewers that allow you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and specialty coffee needs.
- Pre-brew one touch button can change recipes of coffee type, grind and weight.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Field selectable for One, Two or Three Batch brewing and warming.
- Access lock - Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.
- Industry leading 3 year warranty

Thermal Decanter Brewers

TDC-01
Single Serve Thermal
Decanter Controller

The **Thermal Decanter Single Brewer Controller**, (TDC) was designed for foodservice brewers using the individual brewer, requiring both time and liquid level control. With controls for coffee brewers, the TDC is a perfect sensing solution for commercial kitchen brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and specialty coffee needs.
- Pre-infusion one touch button can change recipes of coffee type, grind and weight.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Access lock – Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.

Thermal Server Brewers

TSC-01
Thermal Server Controller 

The **Thermal Server Controller**, (TSC-01/02) was designed for foodservice brewers using an individual brewer or multiple brewers, requiring both time and liquid level control. With controls for one or two coffee brewers, the TSC is a perfect sensing solution for commercial kitchen brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and specialty coffee needs.
- Pre-infusion one touch button can change recipes of coffee type, grind and weight.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Access lock – Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.

TSC-02
Thermal Server Controller  

Airpot Brewers

ABC-01
Single Airpot Brewer 

ABC-02
Dual Airpot Brewer  

The **Airpot Brewer Controller**, (ABC-01/02) was designed for foodservice decanters using 1 or 2 warmers, requiring both time and liquid level control. With controls managing 1 or 2 individual brewers, the Airpot Brewer Controller is a perfect sensing solution for commercial kitchen brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and specialty coffee needs.
- Pre-infusion one touch button can change recipes of coffee type, grind and weight.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Access lock – Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.

Satellite Brewers

CSC-01
Single Satellite Brewer 

CSC-02
Twin Satellite Brewer  

The **Coffee Satellite Controller**, (CSC-01/02) was designed for foodservice satellite brewers using 1 or 2 warmers, requiring both time and liquid level control. With controls for 1 or 2 individual warmers, the Coffee Satellite Controller is a perfect sensing solution for commercial kitchen brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and specialty coffee needs.
- Pre-infusion one touch button can change recipes of coffee type, grind and weight.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Access lock – Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.

Tea Server

TBC-01
Tea Brewer Controller 

The **Tea Brewer Controller**, (TBC-01) was designed for foodservice brewers using the a individual or multiple tea brewers, requiring both time and liquid level control. With controls for tea brewers, the TBC is a perfect sensing solution for commercial kitchen tea brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

TCC-02
Tea & Coffee Combo
Controller  

The **Tea & Coffee Combo Brewer Controller**, (TCC) was designed for food-service brewers using combination brewers for separate programming from one unit, requiring both time and liquid level control. With controls for both individual tea & coffee brewers, as well as programmable training guides, the TCC is a perfect sensing solution for commercial kitchen brewers that allows you to maximize quality and flavor, while reducing service and maintenance.

Features

- Provides precise control over all aspects of brewing, time, temperature, volume, and for a variety of tea leaves and their needs.
- Pre-infusion to intermittent brewing in an intuitive easy-to-read and operate system.
- Intuitive & Easy scroll-through precision programming.
- High contrast, bright and clear, display communicates functions at a glance.
- Easily adjust time, volume, temperature, brew functions and more.
- Access lock – Changeable access code prevents unauthorized tampering.
- All Features & Capabilities customizable to your specifications.

Renau Corporation - Chatsworth, California

FULL-SERVICE MANUFACTURERS

Established in 1981, Renau Corporation has built a reputation as the foodservice industries premier designer and manufacturer of custom controls and commercial kitchen systems. With dedication to innovation and quality, Renau was the first to offer equipment manufacturers digital controls, hybrid relays, touchscreens, and wireless connectivity.

As an ISO 9001:2015 certified US based company, all Renau's processes are designed to consistently deliver superior, quality products time and time again.

Unrivaled product reliability is the combined result of Renau's decades experience of sourcing quality components and vigorous testing standards. This dedication to quality assurance affords Renau the ability to offer an industry leading 3-year warranty. With multiple SMT lines and just over 40 dedicated individuals, our high capacity Los Angeles manufacturing facility produces over 200,000 modules a year.

Renau remains committed to its goal of providing foodservice operators with the best possible tools for ultimate customer satisfaction.
